

10 steps to professionally cleaned air ducts

CLEANER, HEALTHIER, SAFER HOME TO LIVE, WORK AND BREATHE!

1

MONSTER VACUUM

removes the dirt, hair, dust and debris from your ductwork. We use the most powerful vacuums in the industry to keep dust from settling in the ductwork or coming back into the home.

6

ALL OPENINGS ARE CLEANED

on both sides of your air duct system. On the supply side, we clean each register opening through every elbow all the way to the trunk line. For the return air side, we clean from the grill opening through the wall and floor joist cavities into the trunk line.

2

TRAINED TECHNICIANS

give your home's ductwork a deep cleaning that truly makes a difference in what you breathe every day.

7

CLEAN FROM ALL LEVELS

of your home is the only way to make sure every square inch of ductwork gets cleaned, not just at the registers or only from the trunk line.

3

PROTECTING YOUR HOME

every step of the way includes covering doorways, floors, corners, even technicians' shoes. You get a cleaner, safer home without a scratch on the wall or a mess left on the floor.

8

FINISHING TOUCHES

Commercial-grade h.e.p.a. backpack vacuums snatch up dust, debris and dirt as we wrap up. The job isn't done until we replace registers and grills, seal ductwork, sweep floors and remove debris. All we leave is cleaner air for you to breathe.

4

PROTECT YOUR EQUIPMENT

prevents possible contamination of your furnace, evaporator coil and blower during the cleaning process. It's how we remove dust within the ductwork, not move it from one place to another.

9

DOCUMENTATION

Before and after pictures let you see for yourself the difference VacMan makes in the cleanliness of your home.

5

MAXIMIZE VACUUM

means we seal all openings to concentrate airflow and direct those dastardly duct-dwelling dust mites through the ductwork, into the hose and out to the truck. That means you get cleaner ductwork and cleaner air to breathe.

10

YOUR SATISFACTION IS OUR GOAL

We want to leave you a cleaner, healthier, safer home to live, work and breathe in.
